The sentiment for peace is pronounced among all nations and this entiment is being so freely expres here, where the peace movement had its inception, that it is believed Russia may heed the advice of other nations, most of them friendly to her, and indicate that she is ready to open negotiations with Japan. The Associated Press was informed at the Foreign Office that Count Cassini's report places the whole conversation in a purely informal light. It is expected that Russia's answer will be returned in an equally informal man-ner. The officials did not hesitate to express the opinion that the determination to continue the war was fixed and definite. They seemed pleased with the President's friendly spirit, which was manifested in such a form as not to require a formal reply.

Ambassador Meyer did not receive any dispatches on the subject during the day and after the flutter of excitement in diplomatic circles caused by the press dispatches regarding the Washington interview the repre sentatives of the powers here are disposed to look upon the attempts to end the war as fruitless, until after a land battle at least.

Vast Crowds Cheer Youthful Ruler of Dons.

Weather Spoils Most Brilliant Reception Ever Tried.

(BY THE ASSOCIATED PRESS-P.M.) LONDON, June 5.—[By Atlantic Ca-ble.] Alfonso XIII, the young King of Spain, was welcomed to England today with the most elaborate of cere-monies, every detail of which was su-pervised by King Edward himself. Never in the case of reception of a national visitor has greater attention ben paid to detail, or more careful preparation made for a magnificent dis-pliay. If only the weather had been propitious, the reception probably would have been the most brilliant ever ac-corded a foreign visitor to England. A deluge of rain at Portsmouth and at

A deluge of rain at Portsmouth and at London, however, marred all the spec-tacular effects.

The day, which broke drearily in France, increased in gloom as the British royal yacht. Victoria and Albert, crossed the channel from Cher-Abert, crossed the channel from Cherbourg, accompanied by a strong escort of British cruisers and torpedo-boat destroyers. Approaching the mouth of the barbor, the royal yacht passed through line after line of fighting vessels, bedecked with flags and flying the Spanish ensign, a score of which vessels fred the royal salute. The war vessels resembled phantom ships as the Victoria and Albert, emerging from the haze, passed the saluting ranks. The young king, who wore the uniform of a British general, with the ribbon of the Order of the Garter, stood on deck, evidently keenly enjoying the spectacle, in spite of the pouring rain. The Prince of Wales, representing King Edward, awaited the yacht on the dock with a guard of thonor, and immediately after the gangway was run up he went on board and welcomed the Spanish ruler, while at the same time the Prince's standard broke out alongside of the august visitor. Their representative suites were then introduced, and subsequently the Mayor and cor-

spanish ruler, while at the same time the Prince's standard broke out alongside of the august visitor. Their representative suites were then introduced, and subsequently the Mayor and corporation of Portsmouth presented to His Majesty an address of welcome, in responding to which the King said: "I wish to all in this great empire, under your King's scepter, every prosperity, and as you are among the first to welcome my arrival. I request that you alone be the first to convey my gratitude to those whom you represent. Assure them that the remembrance of these happy moments will always be cherished in my heart."

The special train with the King, the Prince of Wales and their suites left Fortsmouth for London amid the thunders of salutes and the cheering of the clowds, while the band played the Spanish national anthem.

The train traveled without incident, except that it was brought to a standstill by an obstruction on the line at Earlington, four and a half miles from Portsmouth. It was at first thought that this obstruction had been purposely placed there, but it developed that a piece of the roof of the Earlington Station had fallen on the track. Buckingham Falace afforded a splendid contrast to the uncomfortable conditions outside. In the grand entrance hall, the King's gentlemen-at-arms and the Yeomen of the Guards, dressed in gold and scarlet uniforms, mounted guard, and at the top of the great staircase Queen Alexandra and Princess Victoria were waiting to give their welcome to King Alfonso, who stopped a step Just below where the Queen was standing, and kissed the tips of her outstretched fingers.

After a few words of greeting, King Alfonso was conducted to the state apartments, and a little later, escorted by cavalry, drove to Marlborough House to pay his respects to the Princess of Wales.

The king then made formal calls on the Duke and Duchess of Connaught, and tonight dined quietly with King Edward and the royal family at Buckingham Palace.

The crowds were somewhat disappointed. In the first place, th

rman Headquarters in Southwest Africa in Hands of Hereros and Garrison Perishes. [BY THE ASSOCIATED PRESS-A.M.]

(BY THE ASSOCIATED PRESS—A.M.)

LONDON, June 5.—(By Atlantic Cable.) A dispatch to a news agency from Cape Town says native reports flave been received in official quarters to the effect that Warm Bad, the German headquarters in Southwest Africahas failen, and that the garrison has perished. No news is obtainable except from native sources.

The rising of the Hereros against the Germans in Southwest Africabroke out in the northern part of that colony early in January, 1904, and the depredations of the natives have continued intermittently ever since. Settlers were obliged to take refuge at the various government stations, where they were attacked and numbers killed. After suffering two slight reverses, German troops last August attacked the Hereros at Waterburg, dispersing them, with heavy loss to the natives. Fresh trouble grose in October through a rising of the Bondelswartis, Hottentots and Witboys in the southern part of the colony. Warm Bad is a mission station in German Southwest Africa, about 135 miles east of the mouth and twenty-three miles north of Orange River. It is not far from the frontier of Cape Colony.—[The Associated Press.

[BT THE ASSOCIATED PRESS—A.M.]

BERLIN, June 5.—[By Atlantic Cable.] Crown Prince Frederick William and the Duchess Cecilia of Mecklenburg-Schwerin today received deputations from the Prussian provinces and cities, who came to Berlin to congratulate them on their marriage, which occurs tomorrow.

The designs of the silver service to be given to the bride and groom by 100 cities were presented. The service tiself, consisting of more than 1000 pieces, will not be ready for two or three years.

Prince and Princess Arisugawa, representing the Emperor and the Empress of Japan, personally presented the gift of Japan today. It consisted of two silver flower bowls of antique and artistic workmanship.

The King of Saxony has given four Meissener vases, the French government two Sevres vases and some Beauvais tapestry, the Sultan of Turkey rare rugs and porcelains, the Austrian Emperor a carriage and two horses, and the province of Posen a state carriage. Beyond these, the presents have not been announced.

EVERETT (Wash.) June 5.—The Pa-life branch of the Longshoremen's In-ernational Union began its annual ouvention here today. Time was given over to preliminary organisation and the hearing of communications. Dele-gates are here from San Francisco, San Pedro, Portland and all the Puget Sound cities. The question of juriadic-tion probably will come up tomorrow.

This fact was accomplished by real. This fact was accomplished by two special trains, one running from New York to Pittsburgh in eight hours and fifty minute, and the other making the trip from Pittsburgh to Chicago in eight hours and ten minutes. The runs were trials of speed to demonstrate the ability of Pennsylvania to put an eighteen-hour trais into service and make schedule with ease under ordinary circumstances.

In several ways the Chicago end of the run was remarkable. All the way from Pittsburgh the special train bearing railroad officials and employés encountered severe head winds, which greatly retarded the speed, but despite this handicap, 48 miles were made at an average rate of 57.7 miles per hour. The New York-Pittsburgh end of the run, necessitating mountain crossing, was made at the average rate of 48 miles an hour. June 5.—The Associated Press correspondent learned today, from what is considered an absolutely reliable source, that the Bur-lington Railroad, which has been conlington Railroad, which has been conducting extensive surveys in the Big Horn Basin, with the view of reaching the Shoshone reservation, has indentifiely postponed its plans to build. The large corps of Burlington surveyors now in the field has been recalled, and the proposed visit of the Burlington officials has been abandoned. This eliminates all prospect of the great railroad construction war in which the Northwestern and Burlington planned to engage in their race for the Shoshone reservation, to be opened up next year. Agreement between railroads and a lack of development are reported to be the reasons for the abandonment of the railroad.

YOKOHAMA. June 5.—[By Pacific Cable.] United States Navy Surgeon Braisted, who has just returned from the Sasebo naval hospital, where the wounded Russians are being treated and cared for, brings the first direct professional report from there. According to Surgeon Braisted, the hospital is in charge of Surgeon in States. There are also some Japanese wounded there, all of whom are doing well.

Rojestvensky is wounded in the forehead and right leg. He is receiving every attention and tender care at the hands of the Japanese and is progressing favorably, although suffering from a severe mental strain. He will soon be convalescent.

The Sasebo Hospital is a model institution, reflecting great credit on the Japanese.

"Although such things usually happen in battle. I am sorry you are wounded. The convenience at this hospital unfortunately are not the best in Japan, for which I am sorry. I hope you will soon recover and be able to return to your country. I praise your valor."

Admiral Rojestvensky replied:

"I thank you deeply. I greatly admire the strength of your fleet, and deem it an honor to have been wounded by so powerful an adversary. Moreover, I deem it a great honor to receive a call from your good self, and I congratulate you upon commanding such a faultless fleet. I pray for your health."

The correspondent says the conversation on both sides was conducted in broken English.

### TREPOFF IS ON THE LID.

Governor-General Made Dictator of the Empire.

To Crush Out Political Agitation is His Job.

Result of Determination to Pursue the War to End.

IBY THE ASSOCIATED PRESS-P.M.I ST. PETERSBURG, June 6, 3:30 a.m. -fBy Atlantic Cable, 1 Emperor Nicho recognition of the step taken by the Emperor's grandfather, Alexander II, immediately after the attempt to blow up the Win-ter Palace in 1880, when he appointed a commission of public safety, headed by Gen. Loris Melikoff, except that the position of Gen. Trepoff will be more analogous to that occupied by Loris Melikoff when later in the same year he was appointed Minister of the Interior, with full control of the police.

was appointed Minister of the Interior, with full control of the police.

"Reaction and repression" doubtless will be the quick interpretation put upon the Emperor's act as soon as it becomes known to the Liberais. Buried in the columns of the Official Messenger and coming almost without warning, the ukase is not yet generally known, but to the initiated the future of Constantine Petrovitch Pobledonostseff, chief procurator of the Holy Synod, looms large. Behind the scenes the old man remains as stern and as uncompromising as ever. He left what many believed to be his dying bed last Thursday and went to Trarskoe-Selo, where he spent almost the entire day with His Majesty.

The decision to place in the thands of the strongest executive in Russia, which Trepoff is universally recognized as being, the power to crush with an iron grasp the political agitation which as brought Russia almost to the brink of revolution, according to public belief, is the fruit of Pobledonostseff's visit, for so far as can be learned, not a single one of the Emperor's ministers was in the secret.

BOLT FROM CLEAR SKY.

BOLT FROM CLEAR SKY. The ukase came like a bolt from lear sky. Bouligan, Minister of the clear sky. Bouligan, Minister of the Interior, could not face the humiliation and immediately resigned, and it is not improbable that other ministers will follow suit. It is rumored in the city that Count Lamsdorff, the Foreign Minister, has already placed his resignation in the hands of the Emperor and that he will be succeeded by Muravieff, former Minister of Justice and now Ambassador at Rome, Admiral

Alexieff has also demanded the acceptance of his demission.

To find a precedent for the resignation of a minister as a protest against imperial action it is necessary to go gack to the resignations of Ministers Loris Melikoff. Milutin and Ignatieff, when, after the assassination of Alexander II. Alexander III repudiated the Liheral policy of his father by issuing his famous manifesto affirming the maintenance of the authority and of the orthodoxy, which stirred the chancellories of Europe to their depths and marked the beginning of the reactionary policy that has lasted until the present liberal agitation began.

Sturmer, an extreme reactionary who belongs to the Von Plehve school, it is commonly reported at this writing, will succeed Bouligan as Minister of the interior, but it matters little who may succeed to that portfolio, as its holder will be a subordinate to Gen. Treport in all matters affecting politics.

In spite of the popular interpretation, however, that Trepoff appointment means repression and reaction to the bitter end, the latter conclusion by no means follows, as it was under Levis Melikoff's dictatorship that the reform programme of Alexander II, was worked out. The same thing may prove true in this case. Indeed, among the contradictory rumors, which are current in the city one is that the ulcase will be completed with the immediate calling of a zemsky sobor, but mothing is definitely known and the Emperor's most influential friends are not aware as to what stand he will take. Whatever he may do, it is now apparent that the Emperor has decided that the hands of the government shall no longer be forced by political agitation and that the legislative assembly shall bear the hall mark of imperial fashioning and not teat of popular ciamor.

TO SILENCE CLAMOR.

TO SILENCE CLAMOR. The decision of the Emperor was un doubtedly precipitated by the Rus

doubtedly precipitated by the Russian disaster in the Sea of Japan, as Literals and Radicals everywhere were preparing to make the best possible use of it in furthering their wishes. The government also will be threatened with pesse demonstrations, the first of which was to be a big meeting of zemstvoists at Moscow today, which Gen. Trepoff, as his first act, prehibited.

On the surface of things therefore

which Gen. Trepoff, as his first act, prechibited.

On the surface of things, therefore, it looks ominously like the placing of Trepoff at the helm to deal with the internal crisis, which the determination to pursue the war is apt to cause. Indeed, there are rumors that a general mobilization has already been decided upon and that the appointment of Trepoff was made so as to enable the government to carry it out.

It is dangerous to forecast the result of the change in the situation. As long as there will be vent for escaping steam in congresses and assemblies pressure did not accumulate, but with the extra weight on the safety valve and with the fires of internal agitation burning hotly there may be an explosion.

Czar their strong belief that the war should be brought to a speedy conclusion. The matter is one of extreme delicacy and difficulty owing to the embarrassing position of Germany. It is an open secret that Emperor William has advised the Czar until now to pursue the campaign despite Russian reverses, with a view to uitimate exhaustion of Japanese resources.

The knowledge that the peace movement would not be secretly opposed by Germany is of high importance. Eriendly but strong advice to seek terms with her adversary, coming from the United States, Englanda France and Germany, could hardly fail to have great influence with the misguided and distracted monarch at Tsarskoe-Selo.

Paris, June 5.—[By Atlantic Cable.] clearly the strong tension is developing in the Cabinet as the result of the rejection by the Sultan of Morocco of the French reform proposals.

The cituation is similar to that when Foreign Minister Delcarse suddenly presented his resignation. (BY DIRECT WIRE TO THE TIMES.) WASHINGTON, June 5,-[Exclusive Dispatch.] The General Staff of the a new corps for the purpose of estab-lishing a system of submarine defenses for the Coast. The plan has been ap-proved by Lleut.-Gen. Chaffee, and will be submitted to Congress at the oming session. This is one of the East, where submarine East, where submarine mines played such an important part in the destruc-tion of ships.

The army has had this matter under consideration for a long time, but it was not until news was received from Port Arthur and the Straits of Korea that it was determined to ask Congress to provide this new arm in the military establishment. The extent of damages suffered by the Russians at Port Arthur by running on concealed mines, and effectiveness of the same devices in the battle between Togo and Rojestvensky are now fairly well known. The fact that the Japanese government, after the battle in the Straits of Korea, admitted that nearly all of its naval losses before Port Arthur were the result of exploding mines, convinced the strategists of the War Department that it is highly important that more attention be paid to this feature of modern warfare.

is highly important that more attention be paid to this feature of modern warfare.

The new corps will embrace 5000 officers and men, who will be trained in specialized work of submarine defense. It is proposed that the members of this corps shall not only have charge of torpedo outfits and shore batteries that will protect mine fields, but that they shall be charged with the care and operation of power plants, searchilghts and other accessories. Their employment for the latter purpose will solve one of the most perplexing problems which has confronted the coast artillery. It is pointed out that it would be unwise to provide the personnel for submarine defense by taking it from the present force of coast artillery, which now has less than one-half of the officers and men required to man and serve the armament already provided.

The estimated cost of equipping the proposed submarine defense is \$4,000,-100. This will provide for a fleet of

Russians south of the Island of Formosa. No instructions on the subject, it is said, have been received from London, and the British government evidently is not disposed to press the matter until full details are received. legraph outfits and fixed

increase telegraph outline and nace indicating nines.

It is expected that the navy will enter an objection to the plan that a fleet of submarines be constructed for operation by the army. There is much jealousy between the two services over which carried a thousand Korean peration by the army. There is much cooles to Salinas Cruz and came here seeking cargo, said today that when Togo's warships gave battle to the Russian fleet every Japanese vessel had been fitted with new guns to replace those used in the earlier part of the war.

Capt. McKechnie claims that he carried thirty-ton naval guns made by the Armstrongs, as well as 500 tons of cordite and two torpedo boats in sections to Kure from England, and he knew of over a dozen steamers which carried naval guns and explosives from England to Japan.

Capt. McKechnie says that the cruiser of submarine boats detailed for the protection of such harbors. It is claimed the general tactics of blockading channels has greatly changed with advent of wireless telegraphy and the more extensive use of torpedoes. This is one of the points that Congress will be called on to settle when it takes up the matter during he coming sension.

NOTABLE DECISION.

[BY THE ASSOCIATED PRESS-P.M.]

CHICAGO, June 5.—A notable decision against the section of the section and the section of the section as the sec SHEA JAILED.

CHICAGO, June 5.—A notable decision affecting conspiracy proceedings was made today by Judge Peter S. Grosscup in the United States District Court. He declared that the jailing of the two labor leaders, Bernard Mulligan and John H. Donahue, for alleged contempt of court in refusing to answer questions possibly incriminating them, was "extraordinary proceedings." Judge Grosscup's opinion, on account of its salient character and widespread applicability, attracted much attention. Mulligan and Donahue, who hat been held in contempt of court by Jüdge Kohlmast for refusing to answer questions before Master in Chancety Euerman, where the defendants were established.

mental law. It is one of the distinctive guarantees of Anglo-Saxon civil liberty. It takes equal rank with those constitutional prohibitions in favor of the individual as against the State that forbid the Impairment of contract or the taking of property without due process of law, and a constitutional guarantee cannot be forfeited. In the promotion of law and order it must not be overlooked, for the promotion of law and order must not itself be lawless.

"The inquiry before the court when this constitutional right is invoked always is: Is the protection asked for simply as a mask to cover the witness' disinclination to answer the question or is the protection asked for in good faith, to shield the witness against himself in

tion? Is the danger of incrimination substantial, or is it merely fanciful?

"The testimony taken tends to show among other things that permits were issued by the unions to drivers in the case of goods that were to be allowed delivery, presumably in order that goods not under the protection of such permits should not be allowed delivery. "Now while the issuance of a permit or a person's connection with its issuance, or use, or his connection with an instruction not to pick up or deliver the goods of a certain house may not, standing alone, be criminal, the fact that permits were issued, and that certain instructions were given and accepted may become potent links in the chain of evidence that leads up to the crime of conspiracy; and in the proof of such links, where Mulligan and Donahue to be indicted and put on trial for conspiracy, the burden would be upon the prosecution without any help by compulsory confession of the defendants, to establish the existence of such links. So what, good faith in the invoking of this constitutional guarantee being assumed, it is at least legally discernible that Mulligan and Donahue might properly refuse to give to the government proof of the facts inquired into; for the right of silence is not confined to the last step in the proof of crime; it is not a mere partial right, but a complete right, and accrues the moment a right of the defendant is struck that if followed up would eventually uncover the witness' connection with the crime.

"I cannot help but feel that in all

"I cannot help but feel that in all probability Donahue and Muligan in good faith stood in fear that the testimony taken before the master might be used; against them before the grand jury and might lead as a link in the chain to their incrimination. Under such a preliminary showing the case should be fully investigated by the court of appeals before the sentence is carried to execution.

"The judgment of the Circuit Court in this case will be stayed upon Mulligan and Donahue giving ball in the sum of \$500 each."

TO WITHDRAW CONCESSION.

NEW YORK, June 5.—A dispatch to the Herald from Berlin asserts, on what is claimed as "the highest authority," that an intrigue is being actively worked in China, backed hy powerful Chinese officials, the object of which is to withdraw, forcibly or otherwise, the concession to the American-ICh na Development Company, in which New York art Belgian financiers are heavily interested, for building all the important railroads between Hankow and Canton. The withdrawal of the concession is intended, the correspondent declares, to be the first strong step toward closing the "open door."

Reports of a similar nature were in circulation last January, when it was said the Chinese government threatened to annul the franchise because the American syndicate had sold a controlling interest to Europeans.

The principal question to be discussed will be the adoption of uniform rules as to the safe working-pressure of steam bollers. Another subject which will demand the attention of the delegates is that of securing the passage of a law making it compulsory for all boiler makers to secure licenses, thus to protect the purchasers from many "mysterious" boiler exploisons that might otherwise be traced to carelessness in the manufacture of the boiler.

became breeding piaces for mosquitoes. And these house mosquitoes are the ones that carry yellow fever. The swamp mosquitoes will carry malaria, but they do not carry yellow fever. 'So the problem is very largely narrowed down to killing off these housebred mosquitoes; and the way to kill them off is to destroy their breeding places. The first thing, therefore, was to give Panama an adequate waterworks system. That system is now nearly completed. The source is back in the mountains ten miles away and the water is brought to the city by an aqueduct. The water should be on by the first of July, and after that a month will see yellow fever in Panama on its last legs.

PROBABLY MEXICANS.

The would-be highwaymen are supposed to be Mexicans. They realized their mistake after Ritch announced his identity and ordered them to throw up their hands, while at the same moment he thrust his revolver into their faces. Seeing that they had been trapped, one of the men preferred to fight after the other had weakened.

Shortly after 9:20 o'clock Mrs. C. F. hienge of No. 325 Center street telephoned the police that a man with a revolver in his hand was trying to get into the house of a neighbor, Precilano Vareia, through a window. Detective Ritch was sent from headquarters, but when he arrived at the house the suspicious-looking individual had departed. Ritch then began a search for the supposed burglar, and walked to Ducommun street, where in a dark place le was suddenly confronted by two men.

THROW UP YOUR HANDS."

Instinctively the officer says he knew a hold-up game was about to be attempted and he reached for his revolver. One of the men made a motion to draw a weapon, but Ritch was too quick for him as he drew his own gun and shouted:

"I'm an officer; throw up your hands." Instantly the smaller of the two men obeyed the command, but the other whipped out a pistol and fired point-bisnk at Ritch at a distance of about giv, feet. Then the man dodged behind his partner, who stood with hands elevated, and fired again. Meantime Ritch had fired, but his aim was not accurate. Then a running fight began in which both men emptied their twolvers.

Ritch says he could easily have shot he man down, who stood with his ands up, but he did not desire to 40 of and therefore he concentrated his re of the other robber, who was busy sturning shot for shot.

the police are making rigid investigations.

W. A. York and O. R. McChord were arrested yesterday morning at the Reed House, No. 116 East First street, by Detectives Leon and Benedict. Monday night a man named Maryland was picked up, in the same place, and now the trio are being put through a "sweating" process, which it is hoped will throw considerable light on a number of burglaries recently committed.

The police will give out no information concerning the evidence secured thus far, but it is intimated that enough has ben gathered to justify the detention of the men until their records can be carefully investigated. When arrested York and McChord vigorously protested and strenuously objected to going to jail. At first they refused to open their door, and only compiled with the demands of the officers, after the latter had threatened to enter through the transom.

THE O'L INDUSTRY. OCAL OIL MEN WON THE DAY.

CITY COUNCIL DECIDES FOR OUR HOME INDUSTRY.

Sunset Men Turned Down by Unanimous Vote and no Ninety Per Cent. Asphalt Oil to be Called for Soldiers' for-Oil Prices in San Francisco.

Local oll won the day in the city ouncil yesterday afternoon. Sunset nade a hard fight, but Mr. Baldwin's good fortune that served him so well with the county supervisors, deserted

reward of \$50,000 for the discovery of the person who has for two years been writing letters to him demanding a large sum of money or dire results. The offer of the reward reveals a story of months of haunting fear which have made life unbearable for the members of the family.

Mr. and Mrs. Tonkin had three daughters. One, Virginia, died three years ago. The shock affected the parents greatly. It is said the body was embalmed and kept in the house for nearly eight months, when the authorities interfered and it was buried.

Soon after this came the first letter demanding money or threatening harm to Rosamond. Since then the missives have arrived at frequent intervals. The child has been so strictly guarded that she has grown morose and sickly.

Tonkin showed the letter to the Oswego police, but no clew to the writer could be obtained. Private detectives were employed, with no better results. With nerves shattered by the strain, Mrs. Tonkin took Rosamond to New York six months ago, where apartments were engaged. They were unsuccessful as the other had been, and finally, broken in health and spiritless, Tonkin returned to Oswego with the child. Armed coachmen and detectives always accompany Rosamond when she leaves the house.

May 28, near here. Cora Sweet, a child, was dragged into a lonely field by a farm hand, and murdered. The crime stirred the whole city, and the farm hand, who confessed, was protected with difficulty. This murder so alarmed Mr. and Mrs. Tonkin that they offered the reward in the belief that it would stimulate search of the letter writer.

The last letter received demanded \$50,000, threatening the death of the daughter if it was refused. None of the letters has told how or where the daughter if it was refused. None of the letters has told how or where the daughter if it was refused. None of the letters has told how or where the daughter if it was refused. None of the letters has told how or where the daughter if it was refused. None of the letters has told how or where the daughter if it was writer.

SOLDIERS' HOME CONTRACT. Bids to supply oil at the Soldiers' Home at Sawtelle for the fiscal year Home at Sawtelle for the fiscal year beginning July I were opened last week and were as follows: Associated Oil Company, 52.2 cents a barrel; Mrs. E. A. Summers, 54.2: McCrary Oil Company, 59; Standard, 52; Union Oil Company, 43. On this basis the contract may be expected to go to the Union. The amount is about 10,000 barrels.

The fact that the Standard, in this case as in quite a number of recess. case, as in quite a number of recent ones, put in one of the highest bids is regarded as somewhat peculiar. While he. great seeking to do a large crude oil business at present, it is doing some and has taken a number of contracts recently. OIL IN SAN FRANCISCO.

tion Company's line, 3 cents.

The price quoted to consumers is by no means as low as what fuel is being supplied for in Los Angeles by the Associated-Amalgamated, which, according to public record, is furnishing oil to the city water department at 39 cents, delivered at Buena Vista street pumping station and 47 cents at Slauson avenue station. According to reports believed to be reliable, it is furnishing oil at 43 cents to several of the largest corporations consuming oil in the city.

Shaw and Sunday-schools.

Secretary Shaw did not leave Cleveland without attending Sunday school and addressing the children. He wished the little ones to know that he and many other public men in Washington are church members, and even teachers in the Sunday school. As, for himself, the Secretary could point with honest pride to the fact that he had been a Sunday school superintendent for twenty years. From Cleveland Mr. been a Sunday school superintendent for twenty years. From Cleveland Mr. Shaw went to Oklahoma to address a tri-State convention of the Young Men's Christian Association. ## VIM FOR MEN

FOR ANY MAN UNDER SIXTY WHO DOES NOT FEEL A "HUSKY" AS HE DID-IT'S FOR YOU

There's no rational excuse for a man who is not yet sixty years old grunting and complaining about pains in his back, stiffness in his shoulders and legs, that "tired-feeling," weak back, nerves, indigestion, constipation and failure of vitality. It should not be. Nature started you with a constitution that ought to have held you good until you are eighty and you ought to feel like a boy now. But you have overdone some things and wasted your vitality. You suit have the constitution, but lack the force. That's electricity. You know that electricity vitality. I can restore it.

In receiving their guests the host and hostess were assisted by Mmes. S. S. Salisbury, J. M. Chute, G. D. Cadwallader, W. C. Patterson, C. M. Staub, A. L. Danskin, W. B. Matthews, H. C. Hall, Giles Kellog, Carl Johnson and the Misses Alice and Nell Moore. No cards were issued for the event.

Leave for Europe.

Mrs. Kate Tupper Galpin and her party of young women left last evening for Chicago en route to Europe. They will remain a day or so in Chicago, and pass on directly to Boston, from whence they sail on June 14, on the steamer Winifredian. A large crowd of friends were at the depot to bid the host of pretty girls good-by. Included in the party were Mrs. Walter Ray, Mrs. M. S. Wilson and Misses Emma Bates. Helena Joy, Hazel-Durkee, Lillian Olshausen, Lottie Livingstone and Helen Fulton, who joins the party at Nevada.

Mrs. Frank D. Patterson has issued invitations for the wedding of her daughter, Miss Mary Lewis, and Charles Warner Houston, to take place at the Church of the Unity on Wednesday evening, June 21. Mrs. Houston of Vermont avenue has issued the invitation for the wedding of her daughter, Miss May Houston, and Wallace Jones, which takes place the same evening at the Church of the Unity.

Miss De Laguna and Miss Vance have issued invitations for an "at home" on Wednesday evening, June 14, from 8 until 11 o'clock, at the Westlake School, No. 612 South Alvarado street. The affair is to be a musicale in honor of the closing of the term.

The Inspiration of Ebell's beautiful afternoon of yesterday was Mme. Modjeska, without a doubt.

An honored guest, she sat upon the platform, and Frank Pixley's most ex-

It was a happy coincidence that brought the three attractions of the afternoon together, one of those things that happen, as Mr. Pixley's little lyric hath it, "once in a while."

Mr. Pixley, the first speaker, was introduced by Mrs. King: "Here is one,"

Here is one of the less-familiar verses of the familiar song, which Mr. Randall reeled off yesterday when talking about it:
"Hark to an exiled son's appeal,
Maryland!
My mother State, to thee I kneel,
Maryland!
For life and death, for woe and weal,
Thy peerless chivalry reveal,
And gird thy beauteous limbs with steel.

And gird thy beautiful steel.

Mr. Randall takes particular delight in one of his most recent poems, entitled "Why the Robin's Breast is Red." The opening stanza recites the weary journey of the Savior to Calvary, wearing the crown of thorns, and the second stanzas reveals the origin of the title:

friend of Alexander H. Stevens and Ben Hill.

His most recent poetical effusion is 
"The Unconquered Banner." written 
in answer to "The Conquered Banner" 
of Father Ryan. He has written "At

LEE FOSTER FOUND DEAD.

Lifeless Body Discovered in Bathroom.

End Comes Painlessly at Chester Place Home.

Was Pioneer Business Man of Montana.

Lee W. Foster, was found dead on the floor of his bathroom, at his handsome home, No. 17 Chester Place, shortly before noon yesterday. He diad aone, of apoplexy, and his lifeless body was come upon by his wife, who had gone upstairs to look for him. It was the judgment of his physician that the end was painless as it was sudden.

hour, 8:30 o'clock, in apparently his usual health. Within an hour he com-plained of rheumatic pains in his left arm, with which he had suffered at hour, 8:30 o'clock, in apparently his usual health. Within an hour he complained of rheumatic pains in his left arm, with which he had suffered at intervals for years. After breakfast Mrs. Foster fetched hot-water bags and made him comfortable in the den, then left him to attend to some small household duties. Between 11:30 and 12 o'clock Mrs. Foster returned to the den, and not finding Mr. Foster there went in search of him. She passed through room after room, her alarm raing as no answer came to her calls. At length, looking in at the bathroom, she saw her husband outstretched on the floor. He was dead. He had removed his coat and vest before he fell, and a liniment bottle on the floor suggested that he had gone to the bathroom to rub his alling arm.

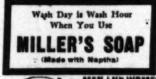

Mrs. Foster summoned the coachman. Together they lifted the body of the husband and master and carried the lifeless form to a couch man adjoining room. Dr. Ray Smith, the family physician, came quickly in response to a telephone call. He pronounced death to have been the result of a stroke of apoplexy, and said that the end had come instantly and priniessity, an bour before.

Mr. Foster had never before suffered a stroke, but he and the members of his family were advised that at any time he might go thus. His weight and his sedentary habits, with a tendency toward rheumatic affections, were inductive, his physician said, of apoplexy.

The funeral will be held at 2 o'clock Thursday afternoon from the family home, the Rev. Dr. Hugh If. Welker, pastor of Imanuel Pressbyterian Church, officiating. Burial will be made in Hollywood Cemetery.

Mr. Foster is survived by the widow and one son, Ross R. Foster. He leaves a fortune roughly estimated at \$200.000. He was a member of the California Club and of the Chamber of Cammerce, and politically was a lifelion of merchandies from Colorado, and there engaged in mining, without, however, making a fortune. A few years later he was in the van of the pioneer husiness invasion of the then wild State of Montana, into whose small

Medding Joke and Dinner.

As a sequel to a small advertisement published in the liner columns of The Times yesterday, an enjoyable wedding dinner was given last night at the Angelus Hotel. Some of the acquaintances of Robert Lanka, who is at the Angelus with his bride, whom he claimed after having made a fortune at Goidheld, perpertated the joke, and the result was such a stunning success that Mr. Lanka summoned the whole bunch of a dozen or more to dinner. The "ad." called for cooks and waiters, and the room of the (for the time being) unhappy couple was besieged all day by scores of Japs and others seekings service. The dinner last night was a happy affair, and none of the guests enjoyed the fun more than the bride and groom.

TUESDAY MORNING, JUNE 6, 1905.

**BIG TURNOUT** FOR KNIGHTS.

Brilliant Reception by the Chember of Commerce.

Cheers for Supreme Knight and for "Joe" Scott.

Latter Likely to Carry Off a National Office.

The much-feted Knights of Columbus began their day of sightseeing and pleasure-seeking early yesterday morning, and they kept it up till a late hour last night. They were successful in every quest, and the general expression is one of surprise at the magnificent manner in which Los Angeles knights and citizens are providing entertainment, as well as of praise for the beauties of the city and its near-by attractions.

League of the Cross Band gave an often-air concert in front of the building, attracting several thousand people.

The formal programme was in charge of the Past State Deputy for California, Joseph Scott. Despite the strenuous days the past week, Scott was at his best, and his pleasing introductions were in keeping with the brightness of the ensemble. The first speaker was United States Senator Flint, who proved himself a true son of the Golden West by Judiciously booming California until even the far-removed New Englanders became enthusiastic.

Senator Flint set forth a picture of the old-time Spanish hospitality, where even a bowl of money was suppide for the guests to use if they wished. "But those times have changed," said the Senator, "and now we reverse it, and try our best to get the stranger to put up his own money for city lots and country real estate, and soon he calls us blessed for doing so.

"We warmly welcome you to Los Angeles. We know that this organization represents the flower of the Catholic lailty all over the country, and we know that the members of the order in this city well maintain the high standing of the membership throughout the nation. They are among the best men of our community in business and professional life—men we are proud to have for our neighbors and our friends—and, judging you by them, we resolve in the visit you are making us. All we hope is that your visit will be so fraught with pleasant memories and experiences that you will long for this Land of Sunshine until you eventually come to cast your lots with us." Hon. Alden Anderson, Lieutenant-Governor of California, next spoke, expressing a welcome to the whole State. He paid a glowing tribute to the personnel of the Knights of Columbus, and declared that his acquaintance with them had proven that they are men who have the highest standard of morality and good citizenship, and that the order wins the admiration of those who learn to know it, regardless of religious views.

Smålar in import was the address of Mayor Owen Mc

tertalment, as well as of praise for the beauties of the city and its near-by attractions.

At 8 o'clock in the morning a special train left the Salt Lake station, bearing a company of about 150 local knights, the popular League of the Cross Cadet Band and a company of cadets in uniform, from St. Vincent's College, in charge of the president of the institution, Very Rev. J. S. Glass, C.M., D.D.

This train ran to Pomona, where it met the official train from the Atlantic Const, and the first greetings were given to Supreme Knight Hearn and the supreme officers.

The Pomona citizens also took a part in this greeting, and a large company was gathered at the Salt Lake stition to extend a California welcome. Representatives of the Pomona Chamber of Commerce expressed this sentiment in short specties, and a graceful response was made by Supreme Knight Hearn.

MR. MEAD'S STATEMENT.

William Mead, who with Homer Laughlin has been working for two years on a plan to introduce in Los Angeles the system of saloon regulation that has made Gothenberg famous, yesterday afternoon made the following statement for The Times:

"Last year several citizens of Los Angeles made a careful investigation of the Gothenberg system with reference to its application in a modified form to Los Angeles. A definite proposition would have Seen made to the city government some months ago but for the no-saloon campaign then on. It is now proposed to invite all citizens having the moral and material welfare of the city at heart to unite in forming a corporation with ample capital and

Miss Lillie Scanion sang "The Star Spangled Banner," and on an encore sang "Maryland, My Maryland," the author of which song was present in the audience.

Chairman Scott then introduced Supreme Knight Edward L. Hearn, and there was an ovation which did not surbeide for several minutes. As soon as Mr. Hearn began to speak he made a complimentary reference to "Joe" Scott, and this again set the great audience wild with enthusiasm. In after years Justice Chambers will probably marvet at his own lion-hearted courage in finding her guilty of cruelty to animals; but he didn't have the nerve to do it all at once; he set her sentence for 20'clock today.

MRS. SHERMAN'S TRIP.

Reed E. Sherman was in Judge
Smith's court yesterday giving his
reasons why he should be granted a
divorce from Carrie Sherman. He is
deaf and it was with difficulty that his
counsel could extract the necessary
facts from him.

But though the husband is deaf, he

counsel could extract the necessary facts from him.

But though the husband is deaf, he is not blind, and he told the court a story of daring infidelity on the part of Mrs. Sherman that was corroborated by other witnesses and by a deposition received from St. Louis. The parties were married on July 5, 1885, and have two children—boys, one being 19 years of age and the other 12.

Last year Mrs. Sherman and the youngest boy went to the St. Louis Fair and put up at a small private hotel. In the absence of Mr. Sherman, one G. S. Green took his place and lived for thirteen days with Mrs. Sherman, both passing as husband and wife and the boy living in the same suite of rooms. She returned to Los Angeles about April, but Green did not arrive until June, and then the intimacy between the two was resumed. The husband had his suspicions aroused and saw enough to prompt him to leave the home on October 11. He left home on Tuesday and on Saturday his wife and Green, with the two boys were installed at No. 221. Avenue 37, where they have lived ever since openly as husband and wife.

The court spoke in strong denunciation of the wife's conduct, and in ordering a decree for the husband, gave the custody of the children to the father.

HEAVY DAMAGES CLAIMED. The suit of Grant Frakes and Louise Frakes against the Pacific Electric Railway Company, to recover \$25,000 damages for personal injuries, went to trial yesterday before Judge Monroe and a jury. Mrs. Frakes was on a car going to Whittier on May 11 of iast year, when the car collided with a train at the junction of the track with the lines of the Southern California Railroad Company, near Los Nietos. The front of the car was smashed and carried away, and Mrs. Frakes was farown to the ground. It is claimed that she is now paralyzed in her lower limbs as a result of her injuries, and she gave her testimony yesterday from an invalid's chair.

In all, over a dozen big ones and as many smaller surf fish fell to Baker's lot, and he was warmly congratulated by fishermen all over town yesterday. Sport was good everywhere, but his

Sport was good everywhere, but his luck was phenomenal for even a good season as this promises to be.

Anglers at all the southern resorts made respectable catches, small "nippers" bothering some at the Terminal wharves, and larger fish being taken south of Alamitos.

The seekers of strenuous sport out-

south of Alamitos.

The seekers of strenuous sport outside were rewarded for once, and at least one fine boxload of fish came into San Pedro from the banks off Portuguese Point.

Three local rod and reel artists who scorn the handline as the tool, started out soon after seven o'clock in the morning in one of Billy Christenson's launches and struck fish about, a mile beyond the whistling buoy off Point Fermin. They got into bonita first and had to leave them through impending inability to accommodate them in the fish box.

A stray barracuda was the sole representative of his kind, and then the yeilowtail got busy. First and last-seven fine ones were brought to gaff.

A pair of 'hog' albicore—the nastiest fish that ever came into a boat—rounded off as nice a catch as anyone could care to make at this season of the year.

Handliners alongside failed utterly, some not even getting strikes on their jigs. The day demonstrated quite fairly a contention often made by good rod and reel fishermen—that their tackle is not only the most pleasant to use, but also the most deadly, hook for hook.

At Redondo a big run of mackerel afforded lucky ones the material for nice breakfasts. nit's and reputation once more had to be withheld.

The difference between league and amateur ball was fully demonstrated if anybody for a minute ever doubted its existence. Playing under double wraps as some of the lockeys used to ride at the race track, the Los Angeles team took the bit in its teeth and even Umpire Morley's best efforts failed to achieve the strong-arm stunt—the Looloos won with disgusting ease in a practice gallop.

Pitcher Lane, who is accounted about the best amateur twirfer in Southern California perched upon the firing line for six innings, and then retired, because of greater proficiency in locating the Looloo batsmen's ribs that it.e home plate. Bill's fast curves were not thumped to any material extent as he seldom put the ball close enough to the stick artists so that they could hit it to the, neitermost precincts of the outfield as all evidenced a design to the stick artists so that they could hit it to the, neitermost precincts of the outfield as all evidenced a design to on every occasion. The Looloos were out for a good time and instead of trying to "punch it safe," every man Jack of them took a long, strong swipe just for luck. And as usual the fielders had the horseshoe.

Bob Fitswilliam came in to the box from first base for the last two innings and in the eighth took his with good grace. Robert's curves looked good to Cravath, and Gavy hammered one into a two-bagger, scoring on a single to right center by Maurice held up his end in fine shape; mafe two of the Looloos runs, one pardonable error, and handled his chances very much like a finished ball player.

Bobby Eager caught for the Catholic collegians, owing to an injury to Campbell, the regular backstop.

St. Vincent's lonely run was born of Flizwilliam's pass in the seventh; a hit batsman and a fielder's choice resulting from Dillon's attempt to do the Tenney act and pinch a runner a laccount with two on bases and none one, the boys could not connect safely.

#### BUSINESS.

The Chicago wheat market closed extremely weak, at 87 1-4 for July.

Most of the day's small business in the New York stock market was done during the first hour of the session. There was noticeable congestion in a few speculative favorites. Bonds were irregular.

THE PROBLEM OF IMMIGRATION.

I There entered the United States last year, mainly from European countries, 812,000 persons, and during the previous year. 857,000, aggregating nearly 1,670,000 for the two years. The arrivals thus far this year exceed those of either of the previous years for the corresponding months, and Director North of the Census Bureau is of the opinion that they will reach the million mark. In that event the addition to our permanent population for the three years 1903-1905 will exceed 2,-670,000. Of the forty-five States of the Union, only six, New York, Pennsylvania, Ohio, Massachusetts, Missourl and Texas, contain that number of people. These figures are very sig-

Where does this inrush of humanity come from? Where does it bestow itself? Is it being assimilated and gradually Americanized? Shall we find it concentrated in certain quarters and locally modifying our ideals and our institutions? If numerical growth of population is desirable regardless of quality, then many of our larger cities have reason for boasting.

Analyzing and classifying this army of newcomers, we find that during the past two years about 500,000 out of the total arrivals, or nearly onethird, are from Italy, Greece and other southern countries of Europe. Many of these crowd the tenement houses of eastern cities, but a modicum of them engage as day laborers in railroad building, and another portion enter the coal, iron and other mines requiring underground work. About 400,000 come from Austria-Hungary and adjacent States, and are probably equally divided between the cities and the

Some protests have been made by labor unions against the commission's going outside of the United States to secure cheap labor for the work in Panama, but the protestants have been informed that "no discrimination will be shown;" that "the competition for contracts will be open to all," and that "the government will accept the most advantageous bids" that may be offered. The "open door" sence of specific instructions from Conmission is clearly bound, unless otherwise directed, to see that the labor of constructing the canal is performed at the lowest expense consistent with

Congress has power, of course, to order that the labor employed shall be taken exclusively from the United States, regardless of expense, but it is not at all probable that Congress will interfere in this matter. The question of obtaining labor for the work on the canal is a question of importance and of some difficulty. It would be the extremity of folly to require shall be employed, for the climatic conditions are such that white men cannot endure them and remain in good health while performing arduous manual labor. The labor, therefore, must necessarily be obtained principally from some country other than the United States. Such being the case, it is eminently proper that the competition of the world shall be invited, and that the contracts shall be

The boxes were perfectly clean and empty, and the coal was introduced, in my presence, without admixture of cotton waste, wood, or other material, and lighted solely by contact with the briquettes.

"The time required to ignite the coal was fifteen minutes. The briquettes themselves burned fortyfive minutes."

LABORERS FOR THE CANAL.

L t appears, from a Washington dispatch, that Secretary Taft is preparing to issue a call for bids "for furnishing an army of laborers to dig the Panama Canal." It has been decided that about 150,000 Japanese laborers will be contracted for from the start, as it has been made apparent that they can be employed at a much lower rate than laborers from the United States for any other country. The laborers are to be hired "in large rangs, through contractors who will

Women janitors are now employed in nearly all the big business blocks. J. W. Fietcher, head janitor of the Grant building, claims the honor of introducing the female j. or to Los Angeles. "It was nine years ago," he said, "that I put the Grat force of women janitors in a Los Angeles business block and it was in the Homer Laughlin building, when it was first opened. Since then I have installed them in the Byrne Block, the Conservative Life building and the Grant building where I now am. I prefer them to men. A woman understands sweeping and cleaning better than a man and a good housekeeper will make a first-class janitor. I employ men to clean the halls and windows, but the sole care of the offices is given over, to women. I pay \$25 a month for twenty-three rooms. In some other blocks they are required to take care of thirty-two rooms for the same salary that I pay. Only six hours' labor a day is necessary, from 5 until 9 o'clock at night and a couple of hours—from 6 to 8—in the morning. It is not hard work and gives one practically all day for something else."

Arthur Letts does not devote all his time to merchandise. He occasionally stops iong enough to take a look at the canary birds, pet spaniels and splendid stock of fancy poultry that he has collected about him at his handsome Hollywood home. Mr. Letts is a strong lover of nature and her creatures and indulges his tastes lavishly in the matter of gathering pets about him. He has a fine aviary stocked with rare birds, among which are several canaries that he purchased in England a couple of years ago. These are trained songsters and have been as thoroughly taught their art as Meiba or Patti. "I would advise lovers of these little birds." says Mr. Letts, "to obtain if possible one of these clucated school masters in Europe. They then attain the highest point of a perfect songster." A patient at a metropolitan hospital goes away best satisfied when he is given something to drink out of a bottle. The drinking, according to ancient ritual, must not be less often than three times a day, and the ceremony must have some reference to meals. The draft, to be efficient, must be colored. It must have a marked odor, so that he may invite his friends to smell it. It should be loathsome to the taste, so that he taking of it may call for some heroism. National Irrigation Works. The first of the great government irrigation works will be formally declared open on June 17. The date deserves to remain recorded as a memorable one in the country's history, for as the scheme progresses, a vast new area of production, formerly deemed worthless, will be added to the national domain. Up to date in these operations all has been paying out of cash. Now, with the throwing open of the first reclaimed area, will come the gradual paying back of the coin disbursed, and the beauty of the whole enterprise lies in the fact that the money thus returned becomes immediately available for the construction of further irrigation plants. A virtually unlimited vista of achievement is thus opened up to the government engineers.

A Nine-million-dollar Project. The first of the great government rrigation works will be formally de-

the government engineers.

A Nine-million-dollar Project.

The first work completed happens also to be the largest one approved to date. It is in the State of Nevada, and no less a sum than \$9,000,000 is being expended to reclaim \$50,000 acres, the cost of reclamation thus approximating \$25 per acre. A canal thirty-one miles in length takes water from the Truckee River, and conveys it to the Carson River. The impounding dam on 'he former stream is three miles east of Clark Station, on the Southern Pacific line. This dam is constructed of interlocking steel piling driven into the rocky bed of the river, and built up with a block of concrete 30 feet wide, each side of which is filled and paved with heavy stone. Gates at the dam regulate the flow of water into the ditch. At the Carson River end a distributing dam has been constructed, and 200 miles of irrigation ditches have already been dug. These will supply water to the first 50,000 acres to be irrigated. The farm units will be eighty acres. Further to indicate the magnitude of the scheme, it may be mentioned that for the main canal, four tunnels had to be cut, in length 400, 450, 900 and 1600 feet, respectively, and that all these tunnels are faced with concrete. The irrigation system, when in full operation, will have a capacity of 1900 gallons per second.

A Boom in Wool.

Owing' to a variety of causes wool at the present time is higher than it has ever been during the past twenty-five years. In the first place the wool crop of America is about 10 per cent. short of what it was last year. Then the war in the Far East has stimulated the demand for the fiber, the Japanese being already manufacturing warm clothing for the eventuality of another winter compasign, and the Russians having ordered large supplies of woolen blankets and wool tents. But also the domestic demand has inalso the domestic demand has in-creased, showing that more and more creased, showing that more and more are the American people financially prospering and dressing themselves in the best fabrics money can purchase. Montana is the first wool State in the Union, then comes Oregon, with Idaho and Wyoming following. Last year wool fetched 13 cents per pound, now it is bringing 20 cents, and as high as 25 cents for choice lots. So the woolralsing States have at last had their innings in the game of all-around naraising States have at last had their innings in the game of all-around national prosperity. And the favorable
conditions are quite likely to continue.
For while the demand for wool grows

Deepest Gold Mine in the World.

Deepest Gold Mine in the World.

The deepest gold mine in the world is now the New Chum Railway mine at Bendigo, Victoria, Australia, which district shared with Bailarat, not far distant, the fame of being the richest plager field in the gold rush days of more than fitty years ago. The alluylal gold has long since been worked out, but during the past twenty years Bendigo has gone in for deep quartz mining, with splendid results, even though the ore is only of a moderate grade of richness. In 1902 the writer of this note descended Lansell's 180-foot shaft at Hendigo, then 28000 feet down, and at the time holding the record for depth. The men were working practically naked, amid dripping water from the roof. Compressed air brought in a pipe down the shaft supplied power for the rock drills, and also enabled the miners to breathe. The temperature was a moist heat, but quite endurable. While the famous Lansell's 180-foot shaft has since gone down a coll over 1000 feet the New Chum fire 180-foot shaft has since gone down a full extra 1000 feet, the New Chum further along the same reef now snatches the record. Its present depth is 4161 feet, whence payable quartz is being raised. There is every confidence that 5280 feet, or the full mile will yet be attained. Thus does the miner for gold conquer all difficulties.

Tesla Patents Expiring.

A great stir has been made among A great stir has been made among eiectricians everywhere by the announcement that the famous patents of Nicola Tesla covering the alternating current dynamo have just expired. They have been widely known for years as the "three fundamental patents." Their expiration is an event in the world of electricity not second in importance to the dying out of the Bell telephone patents. The alternating motor has been a monopoly.

Tesla has been drawing princely reyalties on these patents, much of which the picturesque inventor is said to have applied to his experiments in wireless telegraphy. His mysterious tower at Wardencilife, Long Island, is said to have been built in part by noney subscribed by J. Pierpont Morgan and in part out of the royalties from the motor patents.

In 1885. Prof. Galileo Ferraris of Turin, Italy, discovered the electro magnetic rotating field and applied his invention, according to William Stanle, to a rotating field motor. In 1885 Tesla

received United States patents covering the broad application of the Ferraris discovery. George Westinghouse bought the Tesla patents and also the rights of Ferraris.

The fundamental Tesla patents have been for years in the possession of what is called the "patent pool trust." They have been attacked many times in the courts but without success. It is not

given out to the newspapers from Engineer Lippencott's office states that
"J. G. White & Co. is one of the strongest and most experienced contracting
firms in the United States."

Yesterday's was the second opening
of bids for the Yuma project. Bids
were called for on the 15th of last
March. This was the time of extensive
washouts on the western railroads,
with resultant delayals in mails. There
delays caused five bids to reach the office of the supervising engineer too late
for opening, and the Attorney-General
ruled that they could not be considered.
The Secretary of the Interior
therefore directed a readvertisement
for bids for June 5, with yesterday's
result.

SILVER PRODUCTION.

According to a preliminary estimate by the director of the mint, the production of silver in the United States during 1904 was \$5,00,000 fine ounces, and in a paper by Waldemar Lindgren of the United States Geological Survey, this output is divided as follows:

Silver derived from placers, silver derived from placers, silver derived from placers, silver derived from placers, silver derived from lead ores.

Of the first class the amount is small, 64,000 ounces being the estimate for the year, nearly all of this—about 30,000 each—being in Alaska and California. Small quantities of silver are found in all gold placers, but much of it is never separated from the gold.

The quarts veins are divided into three groups according.

RIFLES MODERN AND ANCIENT.

The visitor will also find in actual operation a complete shell-making plant—thirteen machines in all—turning out the regulation rifle ammunition. Close by the latest magazine rifle adopted for the United States army may be inspected, both complete as carried, and with all its parts shown separately. The deadliness of the weapon is effectively proved by two solid blocks of timber formed of slabs of seasoned oak, cut in section to show the actual penetration of the bullets. With this target placed at a distance of twenty-five feet from the muzzle of the rifle, one bullet will be found to have embedded itself two and a half

The 6-linch face-hardened steel armorplate used at the Sandy Hook proving grounds for testing armor-piercing shot, ripped with holes as a sheet of paper might be ripped, tells its own tale.

Among many other things of interest may be mentioned fine relief models of the Philippines. Porto Rico, Cuba and Alaska, reproducing the exact contour of the country in each case; a relief model of Gaiveston, Tex., showing the new seawail and the mighty engineering difficulties its construction had to overcome; and yet another relief model, this time of New York Harbor, indicating all its shoals and other submarine features. A group of models of all tents used in the United States army, on the scale of 1½ inches to the foot, also arrests attention.

HISTORICAL REMINISCENCES.

Besides a splendid series of large photographs showing actual fighting in the Philippines with More pirates during the years 1902 and 1903, there are pictures of more remote historical interest—plans and maps of famous battlefields in the Civil War. Then there are a number of relics of that great struggle, including two wagons that traveled during their long campaigns several thousands of miles, yet would be serviceable still were they not preserved now as sacred relics. Next our glance rests on the beautiful model of the Arlington National Cemetery, where sleep the country's honored dead. Finally we turn to the plans and pictures of the West Point Military School, where our young soldiers of today are being trained, and read the tablets on the wall recording the roll of its heroes who fell in action in wars with the Indians, in the Mexicap War, in the Civil War, in Cuba and in the Philippines.

I have simply to re-mind my readers that it is as much the duty of a fully equipped national arsenal to make the water canteens as big steel guns. Just a few specially notable things amid the varied display may be pointed out.

SOME OF THE NAVY EXHIBITS. Starting with the navy section, we find a large model of the Holland type of submarine boat, for all the world like a huge codfish of steel; an actual Whitehead torpedo, ready to be launched on its deadly mission, and a very fine relief model of the Naval Academy at Annapoits, Md., showing all the buildings, the lay-out of the grounds, and the stretch of water front. Not to be missed, too, are the samples of smokeless power as used in firing big projectiles; these will surprise most visitors, for the so-called "powder" SOME OF THE NAVY EXHIBITS. really resembles brown-colored candle ends with perforations through their core to produce complete and instanta-neous combustion. an that section of a 13-sading gun manufactured lard, Washington. Another most interesting exhibit is a series of models showing the development of ocean vessels during the last century. In this same section will be found four racks filled with specimens of all muskets and rifles used in America from the days of the smooth-bore matchlocks and ffintlocks onwards. Some of these have an interesting history, as witness this legend on the card attached to one: "Sporting rifle. The school of submarine defense makes a great exhibit, reproducing the essential features of a fortified harbor. SAN BERNARDINO, June 5.—The United States authorities have discovered what they think is a new avenue by which Chinese are brought into this country contrary to law, and several inspectors are now investigating the matter. For months railroad men have noticed that there have been an unusual number of Chinese in and near Needles, and some of them could not speak English. The California officers of the Commerce and Immigrartion Department were notified and inspectors were quietly sent to Needles.

The extent of their discoveries has not been made public, but it is known that they found that Mexicans were doing a profitable business by importing Chinese and passing them into California near Needles. It is supposed that the Chinese were brought up the Colorade River, the journeys being made in the night time. They were landed near Needles so that they could communicate with fellow-countrymen who were in the scheme, and were ready to assist them after they had reached the purchased of being left near the Southern Pacific tracks at Yuma, was that the groximity of Yuma to the Mexican line is such that the presence there of any number of Chinese would excite guspichon.

How Nick Huber Snatched Man from Death.

Thrilling Rescue Near State Asylum at Patton.

SPECIAL CORRESPONDENCE OF THE TIMES. MENTONE, June 5 .- Out of the very jaws of death, an insane man at Pat-ton asylum was snatched yesterday by Nick Huber, whose brain is all fuddled, but whose heart is as brave as when he went round the Horn with the grand old Oregon.

For a minute yesterday when he saw this crazy man walking serenely into death, he was the old dare-devil Sallor Nick again.

Nick again.

It was just as the Santa Fé Flyer came roaring down the stretch from Highland to the asylum buildings. Walking down the track in the most leisurely manner, whistling a little tune, and dressed in his nattiest clothes, swinging a sliver of a cane, was Dr. H. W. Tibbetts of Los Angeles, who is now a patient at the asylum.

He was out for his afternon walk; somehow it came into his crazed brain that the place to stroll with real ele-gance was in front of an oncoming Santa Fe train in the middle of the

Santa Fé train in the middle of the track.

The engineer, supposing that the man would step aside, gave a loud blast on the whistle; but the insane man only smiled and sauntered gaily on. Half a dozen people saw it and knew it-was too late for the train to stop. The engineer turned away his head. The train was almost upon the man; 'twas a matter of seconds.

Suddenly from behind the little brick station came a man running like a demon toward the doomed man, with the stride of a trained athlete. Sailor Nick's great heart had awakened with the thrill of the man's danger. For this minute he was a whole glorious man again; the stuff that went round the Horn with the Oregon.

There was a roar, a grunt, a cloud of dust. The train thundered past and the two crazy men were seen sprawling together in the gutter by the roadside.

When the bystanders rushed up to

PASADENA AND CHAPMAN. NAGASAKI, June 3 .- [Exclusive Dis NAGASAKI, June 3.—(Exclusive Dispatch to Mr. Sowseley of Pasadena.)
My Dear Sowseley: The cardinal causes of Dr. Chapman's defeat in Los Angeles have been the subject of general discussion here. I submit the following analysis:
First—An imperfect reconnoisance and incomplete, faulty and misleading intelligence,
Second—An imperfect battle formation which indicated that Dr. Chapfing which indicated that Dr. Chapfer.

Second—An imperfect battle formation, which indicated that Dr. Chapman did not expect to meet the enemy
in such force.

Third—The weather, the direction
and velocity of the wind, and air-bubbles; Dr. Chapman having the sunshine in his eyes as well as in his soul,
and firing constantly against the wind
and the air bubbles, while the enemy
had the wind abeam and the booze in
the ice tanks.

CREETING THE KNIGHTS.

Under the management of Grand Knight Frank W. Balfour, the local lodge, Knights of Columbus, gave the knights en route to Los Angeles a reception. Last night six delegates from Los Angeles came out and this morning at 6 o'clock, escorted the first section to that city. At 9:20 this morning a special coach containing a host of Los Angeles knights, cadets from St. Vincent's College, and the League of the Cross Band of San Francisco, pulled in to take part in the celebration of the arrival of the eastern Knights of Columbus officials.

The local lodge had prepared 1600 cute little boxes of oranges, two in a box, and the insignia of the order of the Knights of Columbus used as a label on the end. Every knight on the train received as many as he wanted, together with souveirs from Pomona, and had a bouquet pinned to his coat by girls from the school of the Holy Nomes. The train was held here half an hour, and a parade headed by the band was given on the main thoroughfare.

BIG DEMAND FOR VESSELS FOR LUMBER CARRYING.

Rates Increased and Every Available Schooner Placed in Com-mission—New Steamer to be Built for San Pedro Trade—Elks' Lodge Instituted by Visiting Members.

SAN PEDRO, June 5.—After a long period of depression and low rates, ship owners of coastwise vessels age now enjoying a season of prosperity. The lumber business, foreign and from Alaska to Chile, is booming and carriers are in much demand. Saturday the rates for carrying lumber advanced another point. From Puget Sound ports, Willapa Harbor, Gray's Harbor and Columbia to Son Francisco, vessels are now receiving \$5 per thousand feet, and from nothern ports to San Pedro the rate has been fixed at \$6.

and feet, and from nothern ports to San Pedra the rate has been fixed at \$8. After years of lideness the bark C. D. Bryant and the British bark Antiope, now at San Francisco, are to go into commission. The only other idle vessels on the Coast are in Oaklarid Creek. They are the barks Agate, Alden, Bessee, Rufus E. Wood, Yosemite, ships Centennial, Glory of the Seas. J. B. Brown, John A. Briggs and barkentines Northwest and Tropic Bird. Some of these have been condemned and it is not likely they will go to sea again. All possible tonnage, however, will be placed in commission to meet the stress of business.

A result of the unusual demand of carriers will be to give an impetus to the boat-building at the various ship yards in California and the North.

The keel of a new steam schooner will-be laid this week at the ship yard of W. A. Boole & Son in San Francisco. She is to be a vessel 185 feet long. 32.6 feet beam and 13.6 depth. and will have a carrying capacity of 800,000 feet of lumber. She is to be an oil burner. There will be accommodations for forty cabin pussengers. Shares in the new vessel are held by Capt. Bonifield, who was master of the steamer Northland; Capt. H. Z. Howard, John A. S. Lowe of the American Oil Company, Ira Harmon and Capt. W. A. Godfrey. When completed, the new steamer will carry lumber between Gray's Harbor and San Pedro.

### NOW FOR FULL INVESTIGATE INVESTIGATION.

LONG BEACH POLICE SCANDAL BEFORE THE TRUSTEES.

Definite Charges Filed Against City Marshal, Who Declares He Has Nothing to Fear—Status of City's Peace Officers to be Determined-Boulevard Preparations.

LONG BEACH, June 5 .- The sensation of the day was the filing of charges before the City Trustees against City Marshal Conkin by Policeman L. W. Folsom. The document recites that the complainant was duly appointed and elected policeman by the City Trus-tees, but that the Marshal has refused to recognize him or consult with him regarding matters of violation of law which he of right ought to know for the proper maintenance of law and or-der in the city. He also charges that he is denied access to the City Jail to confine prisoners whom he has arrested for offenses within city jurisdiction; that Conklin has denied him access to the office of the City Marshal and threatened him with bodily injury and violence if he should attempt to enter.

threatened him with bodily injury and violence if he should attempt to enter. Complainant further alleges that on or about February 15 the Marshal had certain unclaimed bicycles which he had picked up on the street without authority of law and sold them at public auction and appropriated the proceeds to his own use. He also continues to pick up bicycles and charge owners certain sums to recover them, all of which money he appropriates to his own use and has made no report. Folsom charges further that the City Marshal (who is also Tax and License Collector) has collected moneys from business men without securing the licenses from the City Clerk, that he has made no report of licenses to the City Clerk or shown receipt of moneys paid to the City Treasurer, that the City Clerk is unable to know what licenses are paid and unpaid and that Conklin has made no report, as required, to the City Council, monthly of moneys collected by him. Complainant further says that Conklin has collected moneys and given his receipt for same, but has neglected to turn this money over to the city: that he has also collected part payment on licenses, giving his receipt, and further that in some cases the amounts on the licenses have been changed after being issued.

payment on heenses, giving his receipt, and further that in some cases
the amounts on the licenses have been
changed after being issued.
Folsom asks an investigation and
says he can substantiate all the charges
made. The Trustees referred the
charges to the Police and Sanitary

Committee to investigate. It is probable that an expert will be secured to investigate the books of not only the Marshal, but all the city officials for two years past. So far as known there has never been an expert auditing of the city account books.

Marshal Conklin, when informed of the charges against him, said: "Well, I am ready for an investigation and want it to be as thorough as possible. I have nothing to conceal, therefore have no fear. In March I filed my report as Tax Collector, and it was referred to the Auditing Committee. They have never entered my office, looked at my books or made any report upon my report. So far as Folsom's charges about my appropriating money is concerned it is a falsehood. I denied him admission to the fall or recognition as a police officer because I do not consider that he has any legal authority to act as such. I hope experts will be appointed on the books, and if any money is found due the city it will be paid promptly."

is found due the city it will be paid promptly."

This trouble has been brewing for some time, and much bad feeling exists between the Marshal and the Police Board. Marshal Conklin claims that he is responsible for the acts of the policemen and should therefore appoint his own men with the approval of the Council. A vacancy existed and he appointed Bert Moody, but the Police Board ignored his choice and selected Folsom, since which time there has been constant friction. Conklin denied Folsom admission to the jail and asked his discharge, but the Police Commit-Folsom admission to the jail and asked his discharge, but the Police Commit-tee refused to make any change.

WILL FIGHT THE ORDINANCE.

At the City Trustees' meeting today City Attorney Knight explained the much-talked-of "ordinance of agreement" which in effect gave up the city's rights to the pier or the site of the convention hall save by the pieasuse of the Seaside Water Company. He said to avoid any chance of objection to the new convention hall and by advice of the Trustees, he asked the Seaside Water Company for a quit-claim deed and this agreement was submitted. He drafted it as an ordinance and it was up to the Council to dispose of it as they would. Attorney Williams of the Seaside Water Company told the Trustees that the agreement was drawn up at the solicitation of the City Attorney. They had no objection to the pavilion, but as he insisted on an easement they decided to cover all the points at issue. Asked if they would modify the agreement, Williams said: "No. It is that or nothing."

Th ordinance was referred to the Ordinance Committee, Mayor Eno making the emphatic announcement that he would sign no such agreement, but would fight it to the last ditch. Chairman Campbell of the Ordinance Committee voiced this sentiment and said he would spend every dollar of his own and the city's money before agreeing to such an admission. Attorney Williams then wanted to withdraw the document, but could not, as it was in the hands of the committee. The Trustees then instructed the City Attorney to draw up a contract with George Beard to construct the pavilion, in effect daring the Seaside Company to begin injunction proceedings.

Artillery Salute by Field Gun Manned by Civil War Veterans to be Followed by Parade and Exercises and Sports at North Beach

SANTA MONICA, June 5.-This city is tonight wearing her festival attire in anticipation of the coming of the Knights of Columbus delegates tomorrow. Flags and bunting are everywhere dsplayed. All of the business houses and many of the private residences are decorated. Thousands of visitors are expected and the committees in charge decorated. Thousands of visitors are expected and the committees in charge of the affair have provided a pleasing entertainment. The Cadet Band of San Francisco is due to arrive at 11:45 o'clock and that organization will figure extensively in the exercises, being given the post of honor in the parade, which starts at 1:30 p.m. A field gun has been borrowed from the Soldiers' Home and this will boom a welcome salute from the bluff overlooking the sea. The big gun will be in charge of a squad of Civil War veterans from

the Home.

The parade will disband at the North
Beach band stand, where the following programme will be rendered: Selection by Cadet Band of San Francisco; song of welcome by pupils of the Academy of the Holy Names; address by Hon. T. H. Dudley, Mayor of San Monica; oration, Richard Dilion; song by the pupils of the academy; ring tournament; exhibition drill by students of St. Vincent's College; swimming contest; surf-boat racing. Visitors have the free and exclusive use of the North Beach Bath-house. The ladies of the Reception Committee will serve refreshments to visiting Knights and their friends.

It was promised that the skymobile would make a flight on this day, but the big gas bag is on the beach at Del Rey in a state of collapse. An exhibition drill is scheduled to be given by the company of Rough Ridera from the Oxnard Council.

## CRISIS OF GIRLHOOD

Miss Emma Cole Says that Lydia B Pinkham's Vegetable Compound has Sayed Her Life and Made Her Well

How many lives of beautiful young girls have been sacrificed just as they were ripening into womanhood! How many irregularities or displacements have been developed at this important period, resulting in years of suffering!

Giris' modesty and oversensitiveness often puzzle their mothers and baffle physicians, because they withhold their confidence at this critical period. A mother should come to her child's aid and remember that Lydis E. Pink-

OCEAN PARK. June 5.—Pile drivers are being assembled on the sands of the south beach preparatory to the commencement of work on the recreation pier or piers, as the case may be. It is not clear to the lay mind whether the wharf is to be run out from Marine or Pier avenue, or both. But whatever is to be done will be done quickly, as it is the desire of all concerned to have the pier ready to accommodate the midsummer fishedmen. A few piles are being driven at Marine street as a starter and to keep the permit alive until final plans are decided upon.

IBY THE ASSOCIATED PRESS—P.M.1

CHICAGO, June 5.—Weakness in the wheat market was in evidence at the start, initial questations on July being off '5c to '5c, at 57's, 688's. One reason for the opening decline was the bearish tenor of weekly statistics. The ract that weekl's shipments of wheat during last week were extremely ligures showing the ract that weekl's shipments of wheat form the total movement, were apparently of less interest to traders in general than the figures giving the amount exported from Russia. According to the official statistics shipments of wheat from that councy during the past week were double the total of the previous week. Purthermore, conditions in the United States were apparently regarded as increasing the amount exported in the Southwest was dry and temperatures were much higher. From the start commission houses and shorts were free sellers. As trading progressed selling became more general. With almost nothing from the country but bearish news concerning the erro, weakness became more promounced. One report from Kay in some sections of Southern Kansas, and that operations would be general by next week. At 57, July reached the lowest point of the day. The market closed extremely weak, with July 1 to 1½ lower, at 57's, Considering the excellent weather, the corn market had a remarkably firm undertone. The close was firm and active. July being up \$c. at decided strength in the outs market. July closed \$c. up at 31\$\frac{1}{2}\$. Portaions were firm throughout the entire session. At the chose September pork had gained 125c. Lard was up \$c. to 7\frac{1}{2}\$ at \$2.5c., and ribs were up 10 to 125's.

the resistless torrent of eloquence that would ere the session closed away and bend the reason of a body of men as deliberate and calculating as can be anywhere assembled. But when your Joe Scott stood upon the floor of the convention nand launched his shafts of oratory and eloquence against the members of that body, there was mone to say him may. We who had the pleasure of listening to his sheforical outburst felt our prejudices and predispositions swept aside; and, gentlemen, if you had sat with us that memorable day, when Joe Scott enchanted his hearers with his beautiful description of this charming land, and if you had listened to his eulogy of Celifornia men and California manners, then indeed would you have some to a full appreciation of the man. We proudly say to you that Joe Scott is a credit to your land, to any land, and to any race or any creed.

eny land, and to any race or any creed.

But while we denirens of the far East—we wise men of the East, if you will—are here gazing with admiration on your stalwart selves; while we spell out with ever heightening wonder the gigantic successes you have achieved and prospect the magnificent future that certainly awaits you, we cast loving giances back on our eastern homes, gaze fondly on the rugged. shores of old New England, and retropectively and proudly view the decds of her equally rugged and stering sons. We glory in the history that maniles her hills and vales; we glory in our heroic sires who there fought and died that you and I and our progeny might live and die free men. And we ask you to pardon us while we induge in this mite of self-laudation, in view of the fact that praise of self has grown to be our national characteristic.

that State, and Joseph A. Mercler, State of self has grown to be our national characteristic.

New England—rock-bound, storm—swept, stern and sturdy New England—bas given to this country much that is grand and noble. First among her gifts to the nation is national liberty, our priceless heritage; and second only to national liberty she has given to the country the Knights of Columbus, the protector of the home circle, the drampion of justice, right and truth.

From the historic green, where the undaunted New England formers bared their breasts to the sacrifice on the alitar of patriotism sprang this giorious republic, to be a citize on the alitar of patriotism sprang this brast. And from that same home of patriotic thought and action, where for more than two hundred years have existed the leading educational institutions of the country, came forth a new boon to mankind, the Knights of Columbus. Even in the very paths conden by the hardy pioneers, who carried the spirit of liberty and independence over mountain and valley has followed the triumphal march of this order, which we are here today to represent; an order which has won for itself, through the prudent and conscientious direction of its ligislative and executive bodies, the foremost place in the fraternal insurance societies of the country, an order whose social prestige and influence are second to none.

Gentlemen, we are proud of the Knights of Columbus. The whole curntry must be proud of an order that is a factor for good and promises nothing which it does not fulfill. It is also an undisputed fact that on

the and executive hooks, the foremost the execution of the country, no role who seed a preside and influence are seed to the country must be proud of the Country must be proud to the

For years we have spent on this western empire the best of our brain and sinews. We have sent out hardy picneers to open up for their progeny the services of the land, giving our resources to the end that this domain of natural wealth and power might arise to its empiric state. But now, geatlemen, that we have witnessed the success of the labors of those pioneers, we have resolved to return home and put into the labors of those pioneers, we have the weight discusses in this country, and summing and success in this country, and summing and flowers, we will leave with a summing and flowers, we will leave with a summing and flowers.

National Director George F. Mon-aghan of Detroit, Mich., followed the Supreme Knight with an eloquent adgeles many compliments on the wonderful welcome she had given his
brethren, he presented the claims of
Detroit for the next national gathering.
Other speakers were F. E. Kuhn.
State Deputy for Tennessee, who comes

from Nashville; John G. Ewing of Notre Dame, Ind., State Deputy for that State, and Joseph A. Mercler, State Deputy of Montreal, Can.

At the close of the addresses an informal reception was held, and hundreds of guests passed through the various departments, viewing the exhibits and listening to the tales of the Californians.

With the total number of visitors, estimated at bewteen 8000 and 10,000, estimated at bewteen 8000 and 10,000, and with the seating capacity of the cathedral at only, about 1500, the Knights will have a serious problem before them when services begin at the cathedral at 9 o'clock this morn-

before them when services begin at the cathedral at 9 o'clock this morning. Those-in charge have decided to settle it, by making admissler, to the cathedral by card only, but this has only added to the cares of the various committees. Last night the request for the cards became exceedingly urgent, but in no case will the capacity of the cathedral be exceeded.

The Knights are using every effort of induce their guests to take the trip to Santa Monica today, instead of staying in town. The Santa Monica Council has reserved the bath-house for the Knights and their, friends, and besides an exhibition of games and the like has been provided for the anusement of the visitors. The Knights intend that the families of visiting Knights shall be taken care of while the National Council is in session.
